

HOMEFIRES

America's Exclusive Distributor of Real Flame® Firebaskets

DIMENSIONS

Styles in bold are from the Designer Series.

For Small Fireplaces

(Firebaskets Under 20" tall)

Listed by height: shortest to tallest

(Measurements are approximate and rounded to the nearest half inch)

model #	style	height	front width	back width	depth
4	Chelsea	13"	20"	20"	10"
5	Chelsea with wings*	13"	27"	20"	13"
9	Polished Chaucer	15"	17"	17"	11"
8	Four Urn Warwick	15.5"	20"	20"	11"
15	Cameo**	18"	20"	20.5"	12"

Listed by front width narrowest to widest

(Measurements are approximate and rounded to the nearest half inch)

model #	style	height	front width	back width	depth
9	Polished Chaucer	15"	17"	17"	11"
4	Chelsea	13"	20"	20"	10"
8	Four Urn Warwick	15.5"	20"	20"	11"
15	Cameo**	18"	20"	20.5"	12"
5	Chelsea with wings*	13"	27"	20"	13"

Minimum required fireplace dimensions for SMALL firebaskets:

To properly accommodate small firebaskets, your fireplace opening must have a **minimum height of 20"** and a **minimum depth of 12"**

* CHELSEA WITH WINGS requires a minimum depth of 14"

** CAMEO requires a minimum depth of 13"

Minimum required fireplace dimensions for LARGE firebaskets:

To properly accommodate large firebaskets, we suggest the height of your fireplace opening be **at least 2"-3" taller** than the height of the firebasket.

For the depth we recommend a minimum clearance of at least 1"-2" greater than the depth of the firebasket.

For Large Fireplaces

(Firebaskets Greater than 20" tall)

Listed by front width narrowest to widest

(Measurements are approximate and rounded to the nearest half inch)

model #	style	height	front width	back width	depth
Taller than wide

Widest					
1	Medium Adam	27"	26"	18"	12.5"
3	Connaught	23.5"	29"	19"	12"
12	Cumberland	24"	31"	20"	11"
13	The 761	26"	35"	21"	17"

Please measure your fireplace carefully

All dimensions of your fireplace should be measured and **compared** to the dimensions on this page to make sure the unit you desire will fit and indeed suit your fireplace opening.

Note: If the back wall of your fireplace slopes forward at any point, a unit with a tall backplate may be a difficult fit—unless there is sufficient depth to move the unit forward for adequate clearance at the top.
